

YouMo XCYC

By professionals. For professionals

Mobility is evolving – and so are the demands placed on vehicles in everyday commercial use. Where traditional vans once dominated, cargo e-bikes have become a compelling alternative. But only if they meet the real-world requirements of professional users.

With XCYC, we've developed a solution specifically designed for this purpose: robust, ergonomic, and modular. Built not for the showroom, but for demanding workdays. With years of experience in e-mobility and a clear mission, our focus is simple – to bring vehicles to the road that make daily life easier. Whether in skilled trades, urban logistics, or on the job: XCYC delivers.

This brochure offers an overview of our product range, our philosophy, and our solutions tailored to various industries.

XCYC

Cargo e-bikes for professional use

XCYC- 'Excites Cycling' (pronounced 'x-cyc') - stands for one clear idea: **cargo e-bikes that make everyday working life noticeably easier.** Designed for companies, municipalities, and people who are out on the road every day.

Since 2024, XCYC has been part of YouMo AG – a company with many years of experience in e-mobility. Our focus is clear: reliability, functionality, and durability are at the heart of every product we develop. We don't build trendy e-bikes – we build real work vehicles. That's what XCYC stands for.

Production takes place in Switzerland, with short distances between development, assembly and quality assurance. This proximity to the real world is reflected in every detail: stable frames, ergonomic components, high payload, reliable technology.

XCYC isn't made for lifestyle. It's made for workyards, city centers, service routes, delivery rounds, and construction sites. For people who need to rely on their vehicle – every single day. Or simply put:

By professionals. For professionals.

Shaping Tomorrow with XCYC

Built for everyday demands

Modular superstructures, a powerful drive system, and ergonomic components help you get more done – efficiently and comfortably, every day.

Full Power. Full Load. Full Control.

With a reinforced frame for a total weight of up to 300 kg, stable double bridge suspension fork and hydraulic disc brakes, it remains safe and reliable even when fully loaded.

Adapts to you - not the other way round

Our cargo e-bikes remain stable and safe even with a maximum load. With a constant turning circle of 340 cm (ALLROUND) and 460 cm (WORK), you can steer with precision, even in tight spaces.

Comfort without compromise

XCYC makes it easier to get on and off the bike with a lowerable seat post and secures the vehicle when loading and unloading with the parking brake. The upright seating position and simple operation are easy on the back and make it easier to get on - even when changing riders.

Ready for a wide range of tasks: our cargo e-bikes in action

Last mile delivery

XCYC offers a smart solution for inner-city transport - efficient, flexible and emission-free.

Advantages:

- No parking stress
- High payload
- Fast & manoeuvrable in city traffic
- Avoiding traffic jams in the city centre
- Quieter, cleaner and more efficient on the road

First mile delivery

Spare parts, tools or materials - XCYC brings them directly from the warehouse to the place of use.

Advantages:

- Faster than conventional vehicles over short distances
- Long battery life - even when fully loaded
- Seamless integration into existing logistics workflows

Craft businesses

With the XCYC Cargo E-Bike, you can take your equipment directly to where it is needed.

Advantages:

- Cost efficiency - lower costs than vans
- Compact & maneuverable - ideal for narrow access roads & company premises
- Sustainable - emission-free and quiet
- More productive - smooth processes, less downtime, more efficiency

Municipalities & communes

From green space maintenance and cemetery services to street cleaning.

Advantages:

- Up to 300 kg total weight for heavy jobs
- Easy transport of tools & equipment
- No noise, no exhaust fumes - more quality of life
- Clean through the city - also for cleaning & waste disposal

Ready for a wide range of tasks: our cargo e-bikes in action

Agriculture

Feed, tools or harvest crates: XCYC reliably transports up to 300 kg - wherever the tractor is too big and the journey too long.

Advantages:

- Ideal for transporting feed & stable work
- Quiet & animal-friendly - no engine noise in the barn
- Efficient for all on-farm and off-road routes
- Also for cleaning & disposal in the village
- Customisable with superstructures: box, railing, tarpaulin, tipper

Families / private individuals

Bulk shopping, boxes or dog crates: XCYC takes heavy loads off your hands and saves you time, the search for a parking space and stress.

Advantages:

- Plenty of storage space for shopping, bags & luggage
- Also suitable for transport boxes, tools or dogs
- No need to search for parking or struggle with tight spaces
- More affordable than a second car
- Quick and convenient – also on bike paths

Clubs & social institutions

XCYC supports your club with the transport of information material, equipment or catering, whether for training, events or campaigns.

Advantages:

- Space for equipment, tents, balls, nets & more
- Ideal for street festivals, markets, information stands or tournaments
- Versatile use for environmental, cultural, and sports clubs

Tourism

XCYC supports tourism businesses with luggage transport, material supply and guest services.

Advantages:

- Ideal for car-free regions, holiday resorts & campsites
- Transport luggage, picnic boxes or equipment safely
- Ideal for day trips, guided tours, and wine tastings

XCYC WORK

Efficient and ready for any challenge

The **XCYC Work is a transport vehicle** for professional use. With a total weight of up to **300 kg**, powerful drive components and a wide range of superstructures, the XCYC Work is ideal for businesses, municipal services and commercial transport.
